HOOKED ON SCHOOL DAYS

ACTIVITY SHEET

School Perseverance Certificate

Activity idea: elementary cycles 2 and 3, high school

If you work in the education or community sector, why not hold an event to recognize young people who have showed ongoing effort in their studies or to stay in school?

Organize an official certificate presentation ceremony with, for example, the teachers or specialists committee, or your school's or organization's administration, in partnership with a municipal representative. Be sure to invite parents and members of the community.

Take a photo of the event and share it on your social media accounts using the hashtag **#JPS2027** or post it on your school board's website.

Print the attached certificats and find all of our campaign tools on our website: **journeesperseverancescolaire.com**

Perseverance is the ability to strive toward your goals in the face of adversity, to show resolve and determination when obstacles arise. It is a quality that can help young people blossom in many areas of their lives. For students, its power is undeniable as a driver of academic success. You are not born with it. Instead, perseverance is something young people learn to acquire with the help and support of significant adults.
